

Voice Smart Networks and Western NRG, Inc. Have Joined Forces

Strategic Partnership Creates a Single Source Solution to Provide Customers VoIP Telephony, Virtualized Server / Desktop Technology and Enterprise Class Internet Security

VENTURA, CA — May 12, 2009 — Voice Smart Networks, an industry leader in unified communications, announced today that the company has joined forces with Western NRG, Inc. The strategic partnership creates a single source solution that provides customers of both companies with VoIP telephony, virtualized server/desktop technology and enterprise class Internet security. The value proposition to the area's small to mid-sized businesses has been enhanced dramatically due to a more full service, one stop shopping menu from which to choose voice, data, hardware and services.

"We have been working with Voice Smart Networks for sometime and have tremendous respect for the manner in which they serve their customers and keep their highly skilled team of professionals at the forefront of technology," said Timothy A. Martinez, president of Western NRG, Inc. "We came to the mutual realization that our combined base of customers would greatly benefit from the synergies of teaming up with one another. We have so much in common regarding our values, company philosophies and treatment of customers, that this couldn't be a more perfect fit."

"Voice Smart Networks has been received with open arms by several of the Western NRG accounts we have already visited," commented Mark Wadnizak, CEO of Voice Smart Networks. "Our respective internal teams are growing in technical expertise by sharing knowledge with one another and our customers will now have the convenience of a single partner solution to provide for all of their IT needs."

Voice Smart Networks is dedicated to providing world class customer support throughout the Southern California and Los Angeles regions. Through unique programs like Customer Advocacy, Voice Smart Networks communicates valuable information such as the latest developments in communications technology, finds creative ways to reduce telephony costs, and guides their customers to a better understanding of how to efficiently utilize technology to achieve their strategic business objectives. The company has successfully differentiated itself in the industry because of its strong focus on understanding each customer's specific needs. As a result, Voice Smart Networks is among the industry's elite in customer satisfaction scores reported by third party research organizations.

Established in 1989, Western NRG, Inc. provides a vast array of IT services to meet the needs of small to mid-sized businesses. These services include network

security, secure remote access, web and email security, continuous data protection, disaster recovery and back up solutions, local area network management / IT services, and wide area network – secure VPN solutions. By partnering with several analogous business systems providers and OEM's, NRG has a unique understanding of the networking requirements for most industries. Leveraging this knowledge over several hundred clients, NRG is able to specialize in both niche markets to provide a host of comprehensive IT services and solutions.

ABOUT VOICE SMART NETWORKS

Founded in 1982, Voice Smart Networks is committed to establishing and maintaining a dynamic partnership with every customer. Extensive technology and service experience allows Voice Smart Networks to team up with industry leading manufactures such as Mitel and ShoreTel to develop an understanding of each customer's unique telecommunications requirements, and in turn, custom design solutions that increase their customer's profitability and make their customer's more competitive within their own industry.
