

## **HD VIDEO CONFERENCING SOLUTION FINALLY MATURES**

*Voice Smart Networks Delivers  
Powerful Technology to SMBs*

LOS ANGELES/VENTURA/ORANGE COUNTY/SAN DIEGO - December 19, 2012 – In today’s market, large enterprises have come to rely heavily on technology in order to help accelerate their businesses. HD video conferencing has long been thought to be a powerful technology reserved exclusively for use by large-scale enterprises. However, recent developments in technology have lowered the total cost of ownership and now smaller organizations can benefit from this impactful technology. In an increasingly global economy, many organizations are looking to reduce travel expenses, collaborate with remote workers and foster real-time collaboration across all areas of a business. HD video conferencing allows organizations to accomplish this and gain competitive advantage in their industry.

Simply explained, HD video conferencing allows users to conduct face-to-face meetings without leaving the office. Multiple parties can collaborate with one another on various projects regardless of location, instantly increasing office productivity. Essentially, this dynamic technology elevates our expectations of basic web and audio conferencing tools. Users can now broadcast important meetings

to other locations, reducing travel expenses and saving lost time. Another factor behind video conferencing’s recent success is due to its ability to show non-verbal communication and increase the “human feel” of meetings.

“Our customers have always expressed a very strong interest in the capacities that videoconferencing solutions deliver but we didn’t to bring this technology to our customers because the cost for this technology was simply too high,” stated Mark Wadnizak, Partner at Voice Smart Networks. “We have built our reputation over the years by truly partnering with our customers, concerning ourselves with their needs and obligating ourselves to only provide them with technology that significantly boosts employee productivity and increases their bottom line. We assert that at the end of the day, technology needs to increase a business’ profitability and give them a competitive advantage or it should not be implemented. HD video conferencing has finally matured to the point where our customers can enjoy the benefits of this technology while simultaneously increasing their overall profitability. We’ve been excited to see how different industries have been applying video conferencing to their businesses and have learned quite a bit throughout our experiences. We look forward to helping our

customers get the most out of their technology.”

### **ABOUT VOICE SMART NETWORKS**

Founded in 1982, Voice Smart Networks is Southern California’s leading data and voice company. The company’s mission is to increase its customers’ profitability, improve their productivity and give them a competitive advantage by implementing the right technology. Voice Smart Networks is the only provider that protects its customers from the two risks of technology - obsolescence and cost. As its customers’ trusted technology advisor, Voice Smart Networks has earned the position as the market leader and its customers’ business through quality products and services.

As a premier member of Technology Assurance Group, Voice Smart Networks is able to fulfill all of its customers’ technology needs. This means that the organization is the ultimate resource for business phone systems (VoIP and Session Initiation Protocol (SIP) provisioning), Managed IT Services, Network Security, Video Conferencing and Disaster Recovery.
